SMASHKARTS SMASH MASTERS

Standard Operating Procedure — Smash Karts Tournament

Scaler School of Technology hereby declares Smashkarts Smash Masters, the official Smash Karts tournament of Yugaantar 2026 under the theme GAMEVERSE. This document is the governing Standard Operating Procedure of the tournament. It sets out the format, rules, and conduct that shall apply to every registered player, host, and member of the Events Team for the duration of the event, and is binding upon all parties from the moment of registration.

1. Tournament Flow

Smashkarts Smash Masters is an individual player tournament, contested in Free-for-All Deathmatch format. It shall be played across four stages — two online qualifying rounds, followed by a Semifinal and a Final, both of which shall be held on campus on the same Event Day.

Stage	Players	Where
Round 1 — Online Qualifier	All registered players (expected: 360)	Online (private lobby)
Round 2 — Online Qualifier	Players advancing from Round 1	Online (private lobby)
Semifinal	40 players advancing from Round 2	On Campus (Event Day)
Final	20 players advancing from the Semifinal	On Campus (Event Day)

1.1 Lobby Formation & Scaling

No lobby shall exceed 20 **competing** players, this being the maximum capacity this tournament allows per Smash Karts match. In addition to the 20 competing players, every lobby shall carry one Host Kart, controlled by a designated member of the Events Team — Smash Karts does not allow the creator of a private lobby to spectate without occupying a kart slot, so every lobby runs at 20 players + 1 Host Kart (21 karts total). The rules governing the Host Kart are set out in Section 1.1.1. Based on the expected 360 registrations, the flow shall be as follows:

Stage	Players	Lobbies (max 20 each)	Advancing
Round 1	360	18	Top 120
Round 2	120	6	Top 40
Semifinal	40	2	Top 20
Final	20	1	Top 3 (Podium)

Should the final registration count rise above or fall below 360, the number of Round 1 lobbies shall be recalculated as Number of Lobbies = ceiling(Total Players ÷ 20), and advancement cutoffs at every subsequent stage shall be

adjusted proportionally by the Events Team — while the Semifinal shall remain capped at 40 players (2 lobbies of 20) and the Final at 20 players (1 lobby).

1.1.1 The Host Kart

Since Smash Karts offers no dedicated spectator mode, every lobby in this tournament — Round 1 through the Final — shall run one Host Kart alongside the 20 competing players, subject to the following rules:

- The Host Kart shall be operated by a designated member of the Events Team, for the purposes of managing the lobby and enabling live broadcast/monitoring of the match.
- The Host Kart shall station itself in a fixed, neutral corner of the arena for the duration of the match and shall not chase, attack, collect weapons aimed at, or otherwise interfere with any competing player.
- The Host Kart does not compete: it shall not appear on the leaderboard, earn points, or affect any player's ranking.
- All competing players must steer clear of the Host Kart. **No player is permitted to attack or eliminate the Host Kart under any circumstance.**
- Any player who eliminates the Host Kart, intentionally or otherwise, shall receive no points or ranking benefit for that elimination and shall additionally be penalized as per Section 3.5.

1.2 Lobby Reshuffle System

Lobbies shall not remain fixed across matches within a stage.

- After the conclusion of each match, all players competing in that stage shall be reshuffled and redistributed into freshly formed lobbies for the next match.
- This system ensures no player meets the same set of opponents twice within a stage.
- A player's ranking shall be determined by their cumulative points across every match played in that stage, independent of which lobby they were placed in for any individual match.
- The Final, being a single lobby of 20 players (plus the Host Kart), shall not require reshuffling.

1.3 Round 1 — Online Qualifier

1. All registered players shall compete in Round 1.
2. Players shall be divided into lobbies of up to 20 competing players each (plus one Host Kart per lobby), as per Section 1.1.
3. Each lobby shall play a set of matches (recommended: 3 to 4) in standard Free-for-All Deathmatch format, with lobbies reshuffled after each match as per Section 1.2.
4. At the end of Round 1, all players shall be ranked by cumulative points across every match played. The top 120 players shall advance to Round 2.

1.4 Round 2 — Online Qualifier

1. The 120 players advancing from Round 1 shall compete in Round 2.
2. Players shall be divided into lobbies of up to 20 competing players each (plus one Host Kart per lobby), as per Section 1.1.
3. Each lobby shall play a set of matches (recommended: 3 to 4) in standard Free-for-All Deathmatch format, with lobbies reshuffled after each match as per Section 1.2.
4. At the end of Round 2, all players shall be ranked by cumulative points across every match played. The top 40 players shall advance to the Semifinal.

1.5 Semifinal — Event Day

1. The 40 players advancing from Round 2 shall compete in the Semifinal, held on campus on Event Day.
2. Players shall be divided into 2 lobbies of 20 competing players each, plus the Host Kart per lobby.

3. Each lobby shall play a set of matches (recommended: 3 to 4), with every match played to a score target of 10 kills. The arena for each match shall be selected via Veto Voting, as per Section 4.4. Lobbies shall be reshuffled after each match as per Section 1.2.
4. At the end of the Semifinal, all 40 players shall be ranked by cumulative points across every match played. The top 20 players shall advance to the Final.

1.6 Final — Event Day

1. The 20 players advancing from the Semifinal shall compete in the Final, played as a single lobby (plus the Host Kart) on campus.
2. The Final shall consist of 3 to 4 matches, each played to a score target of 20 kills, with the arena for each match selected via Veto Voting, as per Section 4.4.
3. Cumulative points across all Final matches shall determine the Champion, Runner-up, and Third Place.

2. Registration & Eligibility

1. Registration shall be on an individual basis. Smashkarts Smash Masters is a solo-player tournament and shall not accept team or duo entries.
2. Every player shall register with a valid college ID or roll number, along with a single, consistent in-game display name to be used throughout the tournament.
3. Each player shall register and compete using only one account. A player found competing under multiple accounts shall be disqualified.
4. Registration shall close on the announced date and time. No entries shall be accepted thereafter.

3. Match Rules & Regulations

The following rules govern every match played under Smashkarts Smash Masters.

3.1 General Conduct

- Players shall be present and checked into their designated lobby at least 10 minutes before their scheduled match slot. Failure to do so shall result in forfeiture of the match.
- All participants shall conduct themselves respectfully toward opponents and the Events Team at all times. Abusive language or harassment, in-game or in person, shall result in immediate disqualification.
- The Host Kart, and the Events Team member operating it, shall be treated with the same respect as any other participant; interference with or harassment directed at the Host Kart or its operator shall be treated as a conduct violation.
- Every player competes individually. Collusion between players to target a common opponent or otherwise manipulate a match outcome is strictly prohibited.

3.2 Match Settings

- All matches shall be played in Free-for-All Deathmatch mode, inside a private custom lobby created and managed by the Events Team.
- Every lobby shall run 20 competing players plus one neutral Host Kart operated by the Events Team (Section 1.1.1); this replaces any spectator-based hosting, since Smash Karts does not support a host joining a lobby without occupying a kart slot.
- Arenas for Round 1 and Round 2 shall be rotated at the discretion of the Events Team. Arenas for the Semifinal and Final shall be determined by Veto Voting, as per Section 4.4.
- The lobby link or room code shall be shared exclusively in the official participant group, a fixed number of minutes before each match, and at no point in advance.

- Standard weapon spawns shall remain enabled for all matches. No custom loadouts or modified game settings shall be permitted.
- Round 1 and Round 2 matches shall run for the standard match duration. Semifinal matches shall end on reaching 10 kills, and Final matches shall end on reaching 20 kills, or when the match time limit is reached, whichever occurs first.

3.3 Fair Play & Anti-Cheat

- The use of macros, auto-aim tools, browser scripts, extensions, or any unauthorized third-party software shall result in immediate disqualification.
- Each player shall play from a single device and browser tab for the duration of a match. Switching devices mid-match without the Events Team's knowledge is prohibited.
- The Events Team may require any player to screen-record or screen-share their gameplay live, particularly during the Semifinal and Final, to verify fair play. As Smash Karts has no dedicated spectator mode, the Host Kart present in every lobby (Section 1.1.1) shall serve as the Events Team's primary in-match vantage point for monitoring conduct.
- Exploiting in-game bugs or glitches for unfair advantage shall be treated as equivalent to hacking.

3.4 Scoring System

Each match places all 20 competing karts from 1st to 20th. Points are awarded on a straight sliding scale, decreasing by 1 point per rank:

Rank in Match	Points
1st	20
2nd	19
3rd	18
4th	17
5th	16
6th	15
7th	14
8th	13
9th	12
10th	11
11th	10
12th	9
13th	8
14th	7
15th	6
16th	5
17th	4
18th	3

Rank in Match	Points
19th	2
20th	1

A player's placement at each stage shall be determined by total points accumulated across every match of that stage. Ties shall be broken, in order, by total eliminations across the stage, then by the player's best single-match rank.

3.5 Penalties & Disqualification

- Warning: issued for minor violations such as late check-in; no point deduction shall apply on the first instance.
- Point Deduction: shall apply for repeated minor violations.
- Host Kart Elimination: any player who eliminates the Host Kart shall forfeit the points from that elimination and shall additionally incur a flat deduction of 2 points from their score for that match; repeated instances shall be treated as a conduct violation and may escalate to disqualification.
- Match Forfeit: shall apply where a player fails to appear within the grace period of 5 minutes past the scheduled start.
- Disqualification: shall apply for cheating, collusion, harassment, multiple-account use, or submission of fraudulent registration details.
- The decision of the Events Team on any penalty shall be final.

3.6 Game Setup

Item	Rule
Devices	BYOD (phone, charger, headphones)
Accounts	Players must use their own BGMI IDs
Internet	Wi-Fi provided; players responsible for device stability
Equipment	No external equipment of any kind on the device — no controllers, or emulators. Bare device only.

4. Event Day — Campus Semifinal & Final

1. The 40 qualifying players shall check in at campus and receive their lobby number and schedule for the Semifinal.
2. A briefing on rules and conduct — including the Host Kart rule in Section 1.1.1 and the penalty for eliminating it — shall be conducted for all players before the first Semifinal match.
3. The lobby link/room code shall be shared exactly as per schedule. The Events Team shall confirm that all 20 players and the Host Kart have joined before each match begins.
4. The Host Kart's live in-game feed shall be broadcast on the projector for the audience, since Smash Karts has no separate spectator mode to draw a broadcast feed from.
5. The leaderboard shall be updated after every match.
6. Upon conclusion of the Semifinal, the top 20 players shall be announced and shall proceed directly into the Final.
7. Upon conclusion of the Final, results shall be announced, followed by prize distribution and the formal close of the event.

4.4 Map Selection — Veto Voting (Semifinal & Final)

For the on-campus Semifinal and Final, the arena for each match shall be decided by a veto-voting process rather than by Events Team discretion alone:

1. Ahead of each match, the Events Team shall shortlist 5 eligible arenas and display them to the lobby before veto voting begins.
2. The two highest-ranked players in that lobby, by cumulative points entering the stage, shall conduct the veto. The higher-ranked of the two vetoes (bans) one arena first, after which the two players alternate one veto each until a single arena remains.
3. The arena remaining after all vetoes have been cast shall be the arena played for that match.
4. Should a nominated player be unavailable or fail to cast a veto within the time set by the Events Team, the Events Team shall veto on that player's behalf.
5. The order of first veto shall alternate between matches within the same lobby, so that no single player holds the first-veto advantage for every match.
6. Round 1 and Round 2 arenas are not subject to veto voting and shall continue to be rotated at the discretion of the Events Team, given the online, large-scale nature of those rounds.

5. Dispute Resolution

- Any dispute regarding a match shall be raised by the player concerned to the Events Team within 15 minutes of the match's conclusion.
- The Events Team shall review all available evidence — the Host Kart's live broadcast/recording, the projector broadcast, or a player's screen recording — and issue a decision at the earliest.
- The decision of the Events Team shall be final and binding.

6. Contingency (Event Day)

- In the event of a lobby or network failure, a backup private room shall be activated and the match restarted rather than resumed.
- In the event of a power outage, backup power shall be provided for the projector and broadcast setup, as well as player charging points.
- In the event of a medical emergency, the nearest first-aid point shall be identified in advance, with the Events Team as the first point of contact.
- A buffer of 30 to 45 minutes shall be built into the schedule to absorb any delay without affecting prize distribution.

7. Prizes

The following prizes shall be awarded to the top three players of the Final:

Position	Prize
1st Place (Champion)	2000
2nd Place (Runner-up)	1200
3rd Place	800
